Team,

MFC G-3 approved the additional platoon last Friday. Yesterday they opened the aperture up a bit. Rgt shaping possibility of entire 100 man dets from G and F to Jordan. Intial plan has the team conducting a PTP at Pickett w/ 1/23/Rgt. MTF

(b)(6) might be submitting some COVID 5ws, awaiting tests. Family contracted, working through minor symptoms.

-Rgt is working the MARCENT action officer for the Jordan exercise. Should have that shortly. (b)(6) will do the IPC at the end of Jan.

-We have DL with MARSOC for RAVENEX. (b)(6) will do the IPC, also late January. Population will be the entirety of F and G RBE

-Talked with both the BC, XO, and OpsO yesterday. They are tracking all...

Subject: Stuff

Team,

Based on where we are at with the battle rhythm, relocation efforts, and Tft, I am going to take

some leave.

Next week concerns:

-Tuesday clean up at Foster to get all dumpsters full before Wednesday p/u. It is our last service. Would like to get all DRMOd palletized as well. Continue with scrappers, awesome they will continue to make trips. When the Regional Facilities Manager comes to inspect, want nothing but DRMO/DLA shipments if they are still there.

(b)(6) has a good plan for next week. Wednesday, clean up at Tft warehouse w/ CPD help. I discussed with (b)(6) as well. Trash wise, if we can wait till after the new years, that would be great. Otherwise, holding out hope (b)(6) procures a dumpster. Really want to avoid dragging it up to Sheridan, where there is little to no capacity for it.

Other:

-Timelines for any COVID appeals, namely (b)(6) SSgt Wallace. Although, I don't think I have seen SSgt W's come back yet.

-We are officially on tap for the Jordon exercise in March (2 x Platoons and a CAAT Section (-))! Looking at a T/O plt from Golf and one from Fox. They will most likely conduct training package at Pickett, swing back for "administrative demob", some leave, BZO/get weapons, and out the door again.

-Based on recent discussions, OAW Marines could start retrograde as early as last week in Jan. 2/24 most likely will be first in the chute. Discussion regarding endex of msn mid-February.

-Back on for COLD RESPONSE supporting 25th MAR! But FY24...LOL. Thanks Gunner.

-We have the 1107 funds for G and F Co PME at the Marine Corps Museum. 1/23 will coordinate.

-We are pushing the COs/SgtMaj's visit to Pickett to the third week in January.

(b)(6) is reviewing the TEEP. I am interested in how they are capturing the exercises (add Jordon), FY22 Holiday Leave, and selfishly a scrub on our monthly comp days. Last thing to work out is how we cram in Northern Strike, who supports, is it even beneficial due to it being in August.

-Awaiting the Limited Death Investigation for (b)(6) waiting on police report/autopsy/toxicology.

(b)(6) will go firm on personal changes after the Jan drill once he can get face to face with the Marines again. Most likely, a new XO, OpsO, H&S Company Commander, S-4, and E Co Cmdr. I have asked the PSRs to hook us up with a S-1 as well.

I will have my box. Will probably start it up every other day. Please text/call with anything time sensitive will gladly assist/do work. I will be tired of the kids in about two days.
